About Me

My goal is to pursue a better rewarding career in my area of specialization as well as learning new technologies and processes so that I can contribute to company's long term growth by offering my full potential

Professional Experience

Srikari Impetus Solution Pvt. Ltd. | Associate Software Engg

04/2023 – Present

- Develop and maintain user interfaces using Angular.
- Strong analytical and problem-solving skills.
- Create, integrate, and manage APIs for seamless interaction between front-end and back-end systems.
- Work with databases such as MySQL and MongoDB to support application functionality.

UDTeSchool Pvt. Ltd. | Trainee Software Engg

04/2022 – 04/2023

- Experience working with databases such as MongoDB.
- Develop and maintain server-side components to support front-end functionalities.
- Experience Node.js developer and knowledge of RESTful API.

Projects

1. KEE -KEE Dating App

11/2023 – Present

- KEE-KEE is a cutting-edge online dating application. Our platform is location-based and leverages geolocation to enable real-time, natural connections between users. We are dedicated to helping people find meaningful relationships by matching users with similar hobbies and interests.

- Our mission is to connect souls for dating by developing an intuitive and user-friendly application. Through KEE-KEE

Key responsibilities:

- Develop and maintain the user interface of the KEE-KEE app using Angular.
- Utilize HTML and CSS to create responsive and visually appealing designs.
- Ensure seamless integration of geolocation features to enable real-time connections.
- Collaborate with the backend team to integrate APIs and enhance app functionality.

2. Hyderabad Water Board

04/2023 – 10/2023

- HMWSSB is the Water Utility Services Board that provides water supply and sewerage services to the entire Hyderabad Metropolitan area and some surrounding municipalities and villages.

Key responsibilities:

- I developed web services using Node.js and tested them with Postman, created APIs with Node.js and Sequelize, and worked on the MCC (Metro Customer Care) screen. I also designed sample screen layouts based on current forms, prepared and communicated reports with business insights, and created screens such as Driver Daily Duty Report, Open Cash Counter, and Morning Report, utilizing Angular, HTML, and CSS.

3. School Management System

04/2022 – 04/2023

- UDT School Management Software is user-friendly for students, teachers, parents, and school management, providing accurate, timely information on exam schedules, attendance, teacher details, course modules, fees, transport, inventory, and the library, thereby streamlining processes, reducing paperwork, and enhancing decision-making.

Key responsibilities:

Spearheaded the end-to-end development of the School Management Software using Node.js for server-side development and utilized HTML, CSS, and JavaScript for building the front-end. Designed robust RESTful APIs for seamless communication between the front-end and back-end, and implemented optimized MongoDB database schemas with Mongoose ORM for efficient data storage, retrieval, and integrity.
