PROJECTS

We-Societi (Community Platform)

Developed a web application that enables users to create, join, and contribute to communities. Implemented the Stripe payment gateway to facilitate transactions. Worked as a front-end developer using ReactJS, and also contributed to the back end with Node.js and MongoDB. Additionally, deployed smart contracts and ensured smooth interactions within the platform.

OCENFLOOR MUSIC (NFT Marketplace)

Developed an NFT marketplace application that enables users to mint, buy, and sell digital assets using blockchain technology. Worked as a front-end developer, interacting with smart contracts to manage transactions. Utilized an Express server for back-end management and ReactJS for the front-end interface.

FINAZER

Managed a comprehensive React application with an Express server and MS-SQL database, incorporating modules for MLM, Microfinance, NIDHI, Real Estate, and Inventory. Implemented payment gateways and payment transfer APIs, along with Two-Factor Authentication (TFA) and JWT authentication for enhanced security.
