Objective:- Seeking a challenging position as a Backend Developer to leverage my expertise in backend technologies, testing, designing, and maintenance. Proficient in Node.js, JavaScript, postman, MongoDB, Express.js, Swagger, unit testing, JWT Authentication security, and Redis for caching. I am committed to contributing to the development and quality management of software programs. Eager to collaborate with a team of motivated individuals to advance the company's goals and objectives.

- React (CRUD) API's Integration.
- Swagger (CRUD) API's Integration.
- Unit test of (CRUD) API's with mocha and chai.
- Email sent to the use by Nodemailer.
- Deploy code in Vercel.

Momkidcare, Backend Developer Intern

February 2023- July

- Created APIs on NodeJS for live project (Customer Relationship Management) Project (CRM)).
- Work with AWS (EC 2, S3 Bucket).
- Work on Nosql (MongoDB).
- Exotel API's Integration.

FunctionUp, Backend Developer trainee

January 2022 - June 2022

- Trained in Backend Development using **Nodejs** with **Express** and **MongoDB**
- Competent in **Git**
- Familiar with **AWS S3**
- Skilled in teamwork, owning tasks and timely deliveries.
- Understand caching fundamentals and familiar with Redis - *Followed best coding practices while building e-commerce website with **AWS s3, JWT, and many more***

PROJECTS

- **Ecommerce and cart - Management | [March-24]** [GitHub Link](#) Create a complete e-commerce website backend like Amazon with multiple APIs for users, product, cart, and order as well. Used JWT authentication to protect APIs. Aws For Object storage, Redis is used for caching, Email sent to the user with nodemailer, Deploy code in vercel, Unit test with mocha and chai, Swagger is used in API.

- **Add Survey | [GitHub Link](#) [Feb-24]** Create a survey of the product with HTML and CSS, perform (CRUD) operation to create delete, and update the survey, add a new survey in the doc folder, and then download the sheet.
- **Book-management | [GitHub Link](#) | [March 22]** Create a book Management service like a library for keeping book track and taking reviews from users with multiple APIs for users, books, and reviews. Used JWT to Create a token to authenticate the user.

- **CollegeInternship | [GitHub](#)**

[Link](#) | [March-22] Create a service for search details for different internships by different colleges.

SKILLS

- Javascript
- Nodejs
- ExpressJs
- NoSql (Mongodb)
- Swagger API
- Unit Test (mocha, chai)
- API Integration in (React)
- Redis
- Git
- AWS S3, EC2
- Postman
- Ubuntu
- Html
- Css
